

The Personal SOS Alarm is a safe and reliable way of getting help when it is needed most. The pendant can be worn around the neck or wrist. It's waterproof and can be worn anywhere in the UK, both indoors and outside.

What's Included?

The personal alarm comes complete with a docking station (for charging), together with a wrist strap and a neck strap (lanyard). Your pendant will be fully programmed so when you receive the alarm, it will be ready to use right away. We can even call to remind you to charge your alarm just in case you forget.

Levels of Service

In case of an Emergency

In case of an emergency, push the SOS button on your pendant and wait a moment; you will then be connected to the emergency response team, who will communicate via your pendant.

Fall Detection

If you take a fall whilst wearing your pendant, the care team will be alerted automatically. They will communicate with you via your pendant, alerting the emergency services, carer or next of kin.

24/7 UK Monitoring Centre

When the alarm is activated, the care team will answer the call and talk directly through your pendant. They will assess the situation and send out appropriate help. It really is that simple.

The safest SOS trigger procedures in the industry

The Personal SOS Alarm is the simplest and most discreet product yet. The Personal Alarm packs an impressive range of features enabling the user to experience multiple benefits at one affordable price plan.

Personal SOS, GPS & Fall Alarms

VETERAN OWNED COMPANY

Personal Alarms are designed to help individuals live more independently. The service is also highly valuable for those who live alone, are at risk of falling, living with dementia, epilepsy, disability or a long term health condition. We also supply to those who have recently returned home from the hospital, are considered vulnerable or worried about their safety.

How it Works

Our Mobile Medical Alert Devices are easy to use. Just press the button and our Alarm Receiving Centre will be contacted immediately - there's no need to dial a number.

STEP 1

Your personal alarm unit will pick up the signal and connect you immediately to our 24 hour emergency response team.

STEP 2

An operator will take your call and confirm that help is on the way – either contacting your nominated key holder or the emergency services if you need them.

STEP 3

Then help will be with you as soon as possible. It really is that simple.

“IT GENUINELY IS AN EXCELLENT SERVICE”

“These guys couldn't do enough for us and helped us every step of the way. We had looked at numerous products but this one seemed to be good to be true. We were so impressed with every single aspect of service and product. It genuinely is an excellent service and it has given all the family reassurance. It even can tell when the wearer goes to bed and gets up in the morning by it telling us when it's in its charger or not! Brilliant.”

B. Melvyn ★ Trustpilot
 “A very friendly company with excellent customer service. The pendant purchased is well made (robust) and the call centre staff are professional and helpful.”
